

## **IN THE CLAIMS:**

The following is a current listing of claims and will replace all prior versions and listings of claims in the application. Please amend the claims as follows:

1-20. (Cancelled).

21. (Previously Presented) A computer readable medium storing instructions that when executed by a computer are capable of causing the computer to:

store a play list transferred via a network, wherein the play list includes one or more items;

generate a user interface;

display the one or more items on the user interface;

determine whether each item in the play list is owned or un-owned; and

indicate on the user interface whether each item is owned or un-owned.

22. (Previously Presented) The computer readable medium of claim 21, wherein the instructions are further capable of causing the computer to initiate a purchase of at least one un-owned item in the play list.

23. (Previously Presented) The computer readable medium of claim 22, wherein the instructions are further capable of causing the computer to generate a button on the user interface that can be selected by a user to initiate the purchase.

24. (Previously Presented) The computer readable medium of claim 21, wherein the instructions are further capable of causing the computer to provide a link to an on-line vendor from which a user can purchase at least one un-owned item in the play list.

25. (Previously Presented) The computer readable medium of claim 24, wherein a purchased item is in the form of music downloaded over the network.

26. (Previously Presented) The computer readable medium of claim 24, wherein a purchased

item is in the form of a compact disc.

27. (Previously Presented) The computer readable medium of claim 24, wherein the play list is created and organized by another party who transfers the play list via an electronic communication over the network.

28. (Previously Presented) The computer readable medium of Claim 27, wherein the electronic communication is electronic mail.

29. (Previously Presented) The computer readable medium of claim 24, wherein the instructions are further capable of causing the computer to indicate that a purchased item has not yet been received.

30. (Previously Presented) The computer readable medium of claim 21, wherein the instructions are further capable of causing the computer to play each owned item selected by a user.

31. (Previously Presented) The computer readable medium of claim 21, wherein the instructions are further capable of causing the computer to play a portion of each un-owned item selected by a user.

32. (Previously Presented) The computer readable medium of claim 21, wherein the play list is created and organized by another party who transfers the play list to a user.

33. (Previously Presented) The computer readable medium of claim 32, wherein the play list is transferred via the network by using an electronic communication.

34. (Previously Presented) The computer readable medium at Claim 33, wherein the electronic communication is electronic mail.

35. (Previously Presented) The computer readable medium of claim 32, wherein the party is a music dealer.

36. (Previously Presented) The computer readable medium of claim 21, wherein the user interface includes a first window region and a second window region, the first window region

including a list icon corresponding to the play list that was transferred and the second window region including titles of the one or more items in the play list and an indication whether each item is owned or un-owned.

37. (Previously Presented) The computer readable medium of claim 36, wherein the user interface includes a third window region having a mechanism that allows a user to initiate a purchase of at least one un-owned item in the play list.

38. (Previously Presented) The computer readable medium of claim 36, wherein the user interface includes a third window region having a link to an on-line vendor from which a user can purchase at least one un-owned item in the play list.

39. (Previously Presented) The computer readable medium of claim 38, wherein the play list is created and organized by another party who transfers the play list via an electronic communication over the network.

40. (Previously Presented) The computer readable medium of claim 39, wherein the electronic communication is electronic mail.

41. (Previously Presented) The computer readable medium of claim 38, wherein the first window region includes a plurality of play lists and each of the play lists has a list icon.

42. (Previously Presented) The computer readable medium of claim 41, wherein the first window region includes a heading corresponding to a category of the play lists.

43. (Previously Presented) The computer readable medium of claim 21, wherein the instructions are further capable of causing the computer to generate status icons that indicate whether each item is owned or un-owned.

44. (Previously Presented) The computer readable medium of claim 43, wherein the instructions are further capable of causing the computer to provide a mechanism that allows a user to initiate a purchase of at least one un-owned item in the play list.

45. (Previously Presented) The computer readable medium of claim 43, wherein the instructions are further capable of causing the computer to provide a link to an on-line vendor

from which a user can purchase at least one un-owned item in the play list.

46. (Previously Presented) The computer readable medium of claim 45, wherein the play list is created and organized by another party who transfers the play list via electronic mail over the network.

47-122. (Cancelled).
